EDUCATION

Pune Institute of Computer Technology

B.E. in Computer Engineering

July 2021 – June 2025

Current GPA: 9.02

Samata International School, Kokamthan

Higher Secondary Education (HSC)

2021

Percentage: 96.2%

TECHNICAL SKILLS

Frameworks/Databases: Next.js | ReactJS | Node.js | Django Rest Framework | Tailwind CSS | MySQL | MongoDB

Programming Languages: C++ | Python | HTML | CSS | Javascript | Typescript

Core Subjects: Data Structures and Algorithm | OOP | Computer Network | DBMS | OS

Tools: Git | Github Actions | Postman | pgAdmin | Docker | Cloudinary | VsCode | Figma

EXPERIENCE

RhythmFlows Solutions

Software Development Intern

June 2023 – Present

Pune, India

- Contributed to **backend development** of **AGDI**, a platform for farmers and consumers to sell and purchase agricultural goods.
- Pioneered a **lightweight library** using **Django Rest Framework** to streamline the **stock inventory management** for the system.
- Developed **REST API endpoints** and reduced **DQL** and **DML** query usage by **20%** using **Django's ORM**.

PIJET

Full Stack Developer Intern

November 2023 – March 2024

Pune, India

- Designed and Developed the official website for PICT's International Journal of Engineering and Technology (**PIJET**) using **Rapid Application Development framework**.
- Engineered a **Conference Management Tool** deployed on a custom **XAMPP server**, reducing deployment costs to **zero** while facilitating the complete blind review process for authors, editors, reviewers, and administrators.
- Utilized **ReactJS** and **Tailwind CSS** for responsive user interfaces, **Node.js** and **Express.js** for robust backend functionality, and **PostgreSQL** for efficient data storage, ensuring seamless user experiences, reliable operations, and scalable data management.
- The project facilitated the publication of **14 research papers** by contributors within the **first month** of deployment in the inaugural volume, highlighting rapid scholarly impact and the success of the project.

PROJECTS

PictoFest | *Next.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Firebase*

- Developed a **full-stack web application** for an art fest, facilitating event management for **3.5K+ users**.
- Designed the voting feature, leading to **4.5K+ votes** cast across multiple entries.
- Implemented **JWT authentication** and **optimized API/database calls**, enhancing platform security and performance, resulting in **1.2K+ event registrations** while keeping the total system cost to just **\$0.38**.
- Built an admin dashboard that streamlined the management of **17+ sub-events** and **1K+ entries**.
- Incorporated payment verification functionality, processing **540+ payments** to ensure secure transactions.

College MCQ Platform | *Next.js, Node.js, Express.js, TypeScript*

- Modernised a user-friendly platform for college students to take assigned MCQ tests and track performance.
- Implemented a system for teachers to create test slots with customizable parameters, random question retrieval, and post-test leaderboards.
- Utilized **Next.js**, **Node.js** with **Express**, and **TypeScript** for scalable, high-performance, and maintainable application development.

EXTRA CURRICULAR

Pictoreal Design Head and Donation Drive Coordinator

PICT, Pune

- Led a team of 90+ designers to design annual college magazine, facilitated skill development in members by instructing in graphic design and video editing techniques, and organized a successful donation drive collecting non-monetary donations worth over 35,000+ INR.
